by Silberne

WASHINGTON D.C.
The National Shrine of the Immaculate conception

The National Shrine, the largest Catholic Church in the United States and the seventh largest in the world is contemporary in style, yet with strong Byzantine-Romanesque influence. Built as were medieval cathedrals without any steel skeleton or framework, the Shrine is fashioned entirely of stone, brick, tile and concrete. The National Shrine stands as a great symbol of the faith and devotion of Catholics throughout the United States.
